SUMMARY

Full Stack Java Developer with a background in web technologies, including HTML, CSS, JavaScript, Bootstrap, MySQL, JQuery, Java, Spring Boot, Node.js, Express.js, React, Django, Typescript, Angular and Firebase. My approach is oriented towards creating efficient solutions to complex challenges, standing out for my curiosity, open-mindedness, adaptability and analytical skills, determination and strong work ethic. In addition, I graduated as a Surveying Technician from Centro de Formación Técnica Santo Tomás.

EXPERIENCE

Front-End Developer

Jan 2025 - Feb 2025

No Country

Remote

I participated in a web application project called CulinariaJobs, a job portal focused on the gastronomic sector. In this project, I played the role of Front-end developer, using HTML, CSS and Bootstrap to create an intuitive and attractive user interface that facilitated the interaction of users with the platform. My work focused on developing visual components that provided a smooth and pleasant experience. I implemented responsive designs to ensure that the application would be accessible from various devices, thus optimizing usability for all users. To efficiently manage and maintain the code, I used tools such as Git and GitHub, which allowed for robust version control and effective collaboration with the team. These tools were instrumental in coordinating the team's efforts and ensuring the integrity of the project throughout the development cycle.

EDUCATION

CFT Santo Tomás

Apr 2020 - May 2024

Surveying technician

Temuco, Chile

Higher level professional technical training in the use of topographic instruments and geographic information systems (ArcGIS), applied to urbanization, building, agriculture, mining, tunnels and road works projects. The curriculum included practical activities and field visits from the beginning of the course, linking the student to the work environment at an early stage. The program also granted relevant academic certifications in the specialty of leveling and cartography.

SKILLS

Technical Skills: HTML, CSS, Javascript, Bootstrap, Git, Github, Mysql, PostgreSQL, SQLite, Java, Springboot, Node.js, Express.js, React, Python, Django, Docker, Typescript, Angular, Firebase.

Languages: English (Intermediate), Spanish (Native)
